Chase's Corner

The timely rains and cool temperatures of July were very favorable to golf course conditions. The maintenance crew was able to complete several projects. All of the bunkers have been edged and we have added decorative stone around the old maintenance facility, improving its overall appearance. August starts our construction period as we will be rebuilding and leveling one or two tees as weather allows. We have also identified an invasive weed in a few of the ponds called Eurasian Milfoil. We are currently working with a pond management company and have begun eradication treatments. This is a very aggressive weed and may take several months to control. Thank you for your patience.
